Description

UPA Direct Southern Green Top Coat is specially formulated for quality hand and machine finishing of plasterboard joints, internal and external corners. A ready-mixed non-asbestos, vinyl-based compounds designed for use for finishing application.

Applications

UPA Direct Southern Green Top Coat should only be applied onto dry surface:

i) Joint Finishing

Apply an even layer of compounds over the dry base coats. Evenly trowel the compounds to a final thin and smooth finish.

ii) To Finish Inside Corners

Apply an even layer of compounds with an internal angle tools over the dry base coat. Evenly run the corner tools to a final thin and smooth finish.

iii) To Finish Outside Corners

Apply an even layer of compounds with the trowel over the dry base coat. Evenly trowel the compounds to a final thin and smooth finish.

Advantages

- Humidity resistant
- Smooth application, long-lasting performance
- Exceptional bond with low shrinkage
- Crack resistance
- Low shrinkage for ease in joint finishing
- Easy to sand
